

Phase 10 – Project Closure & Final Demo

1. Objective

Phase 10 marks the completion of the project. In this phase, a final demo video is created and presented to showcase the working system end-to-end. It also concludes all implementation steps carried out in the previous phases, ensuring that the project objectives have been successfully achieved.

2. Activities Completed in Phase 10

- Preparation of a **demo video** covering the full project lifecycle.
- Validation of all features developed in earlier phases.
- Final walkthrough of:
 - Account and Contact management (Sales process).
 - Case management and assignment (Service process).
 - Reports and dashboards for management.
- Documentation of outcomes, learnings, and challenges faced during the project.

3. Outcomes of Phase 10

- **Successful Demonstration:** A clear video recording that highlights the system functionalities and flows.
- **Verification:** Confirmation that all requirements defined at the start of the project are implemented.
- **Closure:** Marks the end of the development lifecycle with deliverables ready for submission/review.

4. Conclusion

With Phase 10, the project has been successfully completed. All modules have been designed, developed, tested, and demonstrated. The final demo video reflects the combined efforts of all previous phases and provides a complete view of the project's capabilities.

This phase also signifies the formal **closure of the project**, making it ready for evaluation, feedback, or deployment as required.
